

*FESAus is proud to present a Special
Sit Down Lunch Celebration:
Christmas in July &
The 25th Anniversary of FE in WA*

DATE: TUESDAY, July 14, 2009
TIME: 11:30-2:30PM
***Note the time change
PLACE: MELBOURNE HOTEL
COST: \$50.00 per person

Featured Presenter: Mark Knackstedt

Digital Core Technology

Digital core technology provides petroleum engineers and geoscientists with a set of new & unique tools for estimating important rock properties based on high-resolution three-dimensional imaging of rock microstructure & the pore scale distribution of fluids in rock.

About our Presenter:

Mark Knackstedt is a Professor & Head of the Department of Applied Mathematics at the Australian National University and a Visiting Professor at the School of Petroleum Engineering at the University of NSW. He leads the Digital Core Consortium Program at ANU/UNSW. He holds a BSc from Columbia University and PhD from Rice University in Chemical Engineering.
